

GREENER TOWNS

Denton Community Historical Society

The Denton Community Historical Society partnered with PlantNebraska to transform an overgrown lot into a vibrant native landscape celebrating Nebraska's prairie and pioneer heritage. Featuring native trees, prairie perennials, serviceberries, a winding trail, and community gathering spaces, the project has created a sustainable landscape that strengthens environmental stewardship, volunteerism, and community pride.

Funding and Costs

Square Footage by Greener Towns	Trees	Plants	Total Project Value
26,140	2	212	\$2495.21

Species Highlights

Bur Oak
Quercus macrocarpa

Northern Catalpa
Catalpa speciosa

Serviceberry
Amelanchier spp.

Green Infrastructure Impact

- Planted native trees including bur oak and northern catalpa, along with prairie perennials and serviceberries.
- Created a native landscape and sustainable lawn celebrating Nebraska's prairie heritage.

Partners

- Denton Community Historical Society
- PlantNebraska
- Community Volunteers
