Lexington is planning extensive plantings on the peninsula in Plum Creek Park Lake. Recently the City undertook a lake restoration during which a number of trees were removed. This project will begin the replenishment of the peninsula’s plant life, and set the stage for other improvements suggested in a 2013 Park Improvement Plan. The Greener Towns plan calls for 32 deciduous trees and shrubs. Following the project Ag students from the high school will fill in areas with a variety of ornamental grasses they produced in their greenhouse. The tree planting will take place in April and May of 2018.

Who’s involved & costs
- Lexington Lions Club
- Lexington Senior High School Students
- Nebraska Statewide Arboretum
- Project Green Team

$5,000
$1,120
$4,850
$4,850

$10,970

Paid by Greener Towns
Paid by Other Grants
Paid Locally
Donated Time/Goods
Project Value

Take time to develop a planting plan.

Be prepared to embrace a plan that wasn’t originally envisioned.

State Foresters are knowledgeable and want to help achieve excellent results.
