

The HUB partnered with PlantNebraska to transform an underutilized outdoor area into a vibrant, multi-purpose green space featuring garden beds where young adults grow fruits, vegetables, and herbs as part of hands-on life-skills programming that takes participants from seed to table. The HUB has created a lasting outdoor resource that builds practical skills, fosters self-sufficiency, and offers a safe and welcoming space where young people can learn, reflect, and thrive

Funding and Costs

Square Footage Impacted by Greener Towns	Trees	Plants Planted	Project Value
966	7	70	\$14,658

Species Highlights

Aromatic aster
*Symphyotrichum
oblongifolium*

Eldeberry

Serviceberry
Amelanchier genus

Green Infrastructure Impact

- Native & well-adapted plants
- Supports pollinator habitat and increases seasonal biodiversity
- Attracts pollinators to support the produce gardens

Raised vegetable beds before pollinator garden and fruit tree installation.

Partners

- PlantNebraska
- City of Lincoln Stormwater
- Lincoln Landscape
- Midwest Walls
