THE NEBRASKA STATEWIDE ARBORETUM PRESENTS

Justin Evertson & Bob Henrickson, NSA 2021. For more plant information, visit plantnebraska.org or retreenbraska.unl.edu.

Proper tree selection is important in developing drought tolerant landscapes. Most tree species are at least somewhat drought tolerant while some species are exceptionally tolerant. In addition to species selection, other ways to help make landscape more drought resilient include proper placement in the landscape; mulching around trees; planting trees in groups; and improving soil health and organic content.

EXCELLENT DROUGHT TOLERANCE: The following species, when healthy and well-established, will likely survive moderate droughts in eastern Nebraska without supplemental moisture. However, for very severe droughts supplemental moisture may be necessary.

Medium/Large Deciduous Trees (typically over 30 feet tall at maturity)

- 1. Elm, American Ulums americana (disease resistant varieties include 'Valley Forge' and 'New Harmony'; 50'x50')
- 2. Elm, Japanese Ulmus davidiana var. japonica (cold tolerant; rounded; glossy green; 'Discovery' is a cultivar from Manitoba Canada; 45'x 45')
- 3. Elm, 'Cathedral' tough and adaptable; developed in Wisconsin; U. pumila x U. japonica; 40-50'x 40-50'.
- 4. Elm, 'Triumph' cross between 'Vanguard' and 'Accolade'; very adaptable; vigorous upright growth habit; 60'x 40'.
- 5. Elm 'Vanguard' an improved Siberian elm hybrid; VERY tough and adaptable; glossy leaves; 50'x 45'
- 6. Hackberry Celtis occidentalis (native; tough and reliable; distinctive warty bark; arching habit; good street tree; 50'x 50')
- 7. Honeylocust Gleditsia triacanthos (native; very tough and reliable; provides dappled shade; 55'x 40')
- 8. Locust, Black Robinia pseudoacacia (good on poor, dry soils and hot sites; short thorns; fragrant white flowers; 35'x 25';)
- 9. Maple, Boxelder Acer negundo (native to G.P. floodplains; very tough and adaptable; compound leaves; 30'x 25')
- 10. Oak, Bur Quercus macrocarpa (outstanding native; big and majestic; very tough and reliable; 60'x 75')
- 11. Oak, Bur-gambel Quercus macrocarpa × qambelii (hybrid of gambel oak and bur oak; for west. G.P.; 25-40'x 25-45')
- 12. Poplar, Silver Populus alba (tough & adaptable; silvery/white leaves; suckering, weedy habit; can grow up to 80' x 65')

Small Deciduous Trees (under 20' tall)

- 13. Apricot, Manchurian Prunus mandshurica (tough, cold hardy but short lived; attractive pink flowers; 15'x 15')
- 14. Chokecherry Prunus virginiana (tough native; attractive white flowers in spring; good for birds; suckering habit; to 20' tall)
- 15. Chokecherry, Amur Prunus maackii (beautiful metallic amber to dark red-brown bark; short lived; 20'x 15')
- 16. Oak, Gambel Quercus gambelii (native to Rocky Mountains; variable multi-stem habit; prefers well-drained soils; 20'x 15')
- 17. Oak, Wavyleaf Quercus undulata (shrubby but can be trained as a small tree; semi-evergreen; needs testing; 15'x 15')
- 18. Privet, New Mexican Forestiera neo-mexicana (creamy-mottled bark; multi-stem habit; for western G.P.; 12'x 12')

Evergreen Trees

- 19. Juniper, Chinese Juniperus chinensis (tight growing juniper; tree form types available include 'Keteleer'; 15-25'x 10-15')
- 20. Juniper, Rocky Mountain Juniperus scopulorum (native; blue-green foliage; prefers well drained, drier soils; 20-35'x 15-20')
- 21. Pine, Austrian Pinus nigra (common, tough, easy to grow; attractive bark; similar to Ponderosa Pine; disease prone; 50'x 35')
- 22. Pine, Bristlecone Pinus aristata (use on well-drained soils only; great looking "bottle-brush" branch tips; 25'x 20')
- 23. Pine, Limber Pinus flexilis (native; slow growing; soft needles; very flexible branches; plant on well-drained soils; 50'x 30')
- 24. Pine, Pinyon Pinus cembroides var. edulis (very stout, short needles; well-drained soils only; large edible nut; 25'x 20')
- 25. **Pine, Ponderosa** *Pinus ponderosa* (native; best on well-drained soils; attractive cinnamon-brown-black bark; 65'x 30')
 26. **Pine, Southwestern White** *Pinus reflexa* (graceful five-needle pine; 'Vanderwolfs' a common form; 35'x 20')
- 27. **Redcedar, Eastern** *Juniperus virginiana* (very tough; nice striated bark on mature trees; 40'x 30')

GOOD DROUGHT TOLERANCE: The following species will survive most "normal" years but will likely require at least some supplemental moisture during moderate and severe drought periods.

Medium/Large Deciduous Trees (typically over 30 feet tall at maturity)

- 28. Ash, Manchurian Fraxinus mandshurica (from Asia; upright growth; drought tolerant; may be resistant to EAB; 40'x 30')
- 29. Aspen, Quaking Populus tremuloides (native to region; attractive creamy bark & fluttering leaves turn golden-yellow; 30'x 15')
- 30. Buckeye, Ohio Aesculus glabra (native; very tough & adaptable; rounded form; interesting 'buckeye' fruit; 30'x 30')
- 31. Catalpa, Northern Catalpa speciosa (native; tough tree; large, heart-shaped leaves, showy flowers and long seed pods; 50'x 35')
- 32. Cherry, Black Prunus serotina (native; eye-catching when in flower; fast growing, adaptable; 35'x 20')
- 33. Coffeetree, Kentucky Gymnocladus dioicus (native; amazingly adaptable; beautiful winter form; 50'x 40')
- 34. Cottonwood, Eastern Populus deltoides (majestic native; not for extremely dry sites; avoid most cultivars; 80'x 60')
- 35. Lilac, Japanese Tree Syringa reticulata (billowy white flowers in May; attractive bark; can grow to 30'x 25')
- 36. Linden, American Tilia americana (native; large leaves; drought tolerant; heavy shade; fragrant flowers; 60'x 40')
- 37. Linden, Littleleaf Tilia cordata (very tight, pyramidal form; dense shade; many cultivars available; 45'x 30')
- 38. Maple, Bigtooth Acer grandidentatum (Rocky Mountain relative of sugar maple; multi-stem habit; orange fall color; 30'x 20')
- 39. Oak, Chinkapin Quercus muehlenbergii (great native tree; tolerates high pH soils; narrow, chestnut-like leaves; 50'x 40')
- 40. Oak, English Quercus robur (similar to white oak; tough, reliable; long, abundant acorns; narrow types available; 60'x 50')
- 41. Oak, Mongolian Quercus mongolica (similar in appearance to Bur Oak; performing well in N. Dakota; 50'x 45')
- 42. Poplar, Silver Populus alba (tough & adaptable; silvery/white leaves; suckering, weedy habit; can grow up to 80' x 65')
- 43. Walnut, Black Juglans nigra (native; proven throughout Nebraska; tough and reliable; good lumber tree; 60'x 45')

Small Deciduous Trees (under 20' tall)

- 44. Cherry, Canada Red Prunus virginiana 'Shubert' (purple-leaf form of native chokecherry; suckering habit; tough; 20'x 20')
- 45. Crabapple, Flowering Malus spp. (a wide variety of selections with varied flower/fruit colors and size ranges available)
- 46. Hoptree (Wafer Ash) Ptelea trifoliata (large shrub or small tree; rounded form; distinctive disc-like fruit; 15'x 15')
- 47. Maple, Tatarian Acer tataricum (multi-stem habit; easy to grow; drought tolerant; good fall color; 20'x 15')

Evergreen Trees

- 48. Douglasfir Pseudotsuga menziesii (soft blue-green needles; distinctive cones; graceful habit; avoid open sites; 50'x 30')
- 49. Fir, Concolor Abies concolor (attractive blue-green, long, upswept needles; most reliable fir for Nebraska; 50'x 25')
- 50. Pine, Austrian Pinus nigra (common, tough, easy to grow; attractive bark; similar to Ponderosa Pine; disease prone; 50'x 35')
- 51. Pine, Swiss Stone Pinus cembra (to 50' tall; similar to Korean Pine; seldom seen; edible nut; soft foliage)
- 52. Spruce, Black Hills Picea glauca var. densata (alternative to blue spruce; slower growing; native to Black Hills; 50'x 30')
- 53. Spruce, Colorado Picea pungens (very adaptable; common throughout Nebraska; wide size range from 45-70'x 15-35')
