

GREENER TOWNS

Denton Community Center

The Village of Denton partnered with PlantNebraska to refresh and beautify the landscape surrounding the local community center and park, replacing tired plantings with thriving native, pollinator-friendly species that have taken root, bloomed, and filled out beautifully since installation. By investing in native greenspaces at the heart of the community, the project strengthens Denton's sense of place and reinforces the vital role that beautiful, sustainable landscapes play in helping communities thrive.

Funding and Costs

Square Footage by Greener Towns	Volunteers	Plants	Total Project Value
2967	15	718	\$4,472

Species Highlights

'October Skies' aster
Symphyotrichum oblongifolium

Catmint
Nepeta racemosa

Prairie Dropseed
Sporobolus heterolepis

Green Infrastructure Impact

- Grass based landscape helped create a sense of place by evoking the native prairie.
- Native flowering perennials add color to the landscape throughout the summer.
- A low-maintenance design will make this landscape sustainable for village employees and volunteers to maintain for years to come.
